PROFESSIONAL SUMMARY

Results-driven Full Stack (Software Developer) with 5 years of experience architecting and implementing web applications using modern JavaScript frameworks and technologies. Specialized in MERN stack development with expertise in GraphQL and TypeScript. Proven track record of delivering scalable solutions and optimizing application performance.

TECHNICAL SKILLS

Frontend Development

- React.js, TypeScript
- JavaScript (ES6+), HTML5, CSS3
- Bootstrap, MUI
- Modern UI/UX implementation
- Responsive web design

Backend Development

- Node.js, Express.js
- GraphQL, Apollo Server
- WebSocket implementation
- Docker containerization
- Payment Integration(Paystack)
- Firebase integration
- Electron desktop applications
- JWT(JSON Web Tokens) Authentication

Database & Tools

- MySQL
- Git, GitHub
- API design and integration
- Performance optimization

PROFESSIONAL EXPERIENCE

COMPOVINE TECHNOLOGIES LIMITED

Full Stack Developer | June 2025 – Present

- Lead the development of enterprise-grade applications using a comprehensive technology stack including HTML, CSS, Bootstrap, MySQL, React JS, Node JS, Express JS, and PHP.
- Collaborate with cross-functional teams to define, design, and ship new features, ensuring high-quality software delivery.
- Optimize applications for maximum speed and scalability, improving overall performance and user experience.
- Develop and maintain well-documented, reusable, and reliable code to ensure code quality and maintainability.
- Troubleshoot, debug, and upgrade software while ensuring strong security and data protection measures.
- Mentor junior developers and conduct code reviews to uphold best practices and coding standards.
- Integrate third-party services and APIs to extend application functionality and improve efficiency.
- Monitor application performance metrics and implement improvements proactively.

WEB RELATED CONSULTING

Full Stack Developer | January 2025 – May 2025

- Architect and maintain full-stack web applications using PHP and MySQL for robust server-side development and data management.

SYLLABUX LIMITED

Full Stack Developer | November 2023 – December 2024

- Architect and maintain full-stack applications using MERN stack and TypeScript
- Implement advanced API functionality with sophisticated filtering mechanisms.
- Develop real-time communication features using WebSocket technology
- Establish comprehensive logging systems, improving backend transparency and reducing debug time.
- Collaborate with cross-functional teams to deliver high-quality software solutions
- Maintained clean codebases with a focus on scalability, modularity, and security best practices.
- Designed and implemented a secure RBAC system to manage access across multiple user levels.

CEPHAS DIGITAL

Frontend Developer | May 2020 – June 2023

- Engineered intuitive and seamless user interfaces following best practices
- Collaborated with design and backend teams to create responsive web applications
- Implemented state management solutions using Redux
- Participated in code reviews and architectural decisions

SQI COLLEGE OF ICT

Frontend Developer

- Designed and developed responsive web applications using React.js
- Created reusable component libraries to improve development efficiency
- Implemented mobile-first design principles
- Optimized application performance and load times

EDUCATION

Ladoke Akintola University of Technology, Ogbomosho (LAUTECH)

B.Tech Animal Science | March 2015 – June 2021

Second Class Upper Honors

SOFT SKILLS

- Strong problem-solving and analytical abilities
- Excellent communication and collaboration skills
- Adaptable to new technologies and methodologies
- Detail-oriented with focus on code quality

ACHIEVEMENTS

- Successfully implemented real-time features serving 1000+ concurrent users
- Contributed to open-source projects on GitHub
- Mentored junior developers in modern web development practices
